

Engineer with 2+ years of experience at Siemens Healthineers spanning full-stack internal tooling, automation testing, and DevOps practices. Built a MERN platform used by 100+ daily users that eliminated direct Azure DevOps access issues and cut manual effort by ~90%. Automated 150+ test cases across enterprise modules. Actively deepening expertise in Docker, Kubernetes, and Azure Cloud with a long-term focus on DevOps and Cloud Engineering.

WORK EXPERIENCE

Software Engineer Siemens Healthineers

02/2024 - Present

Bengaluru

Achievements/Tasks

- Built a centralized **MERN stack pipeline management platform** used by **100+ daily users**, enabling execution, scheduling, monitoring, and PDF report downloads replacing direct Azure DevOps portal access .
- Implemented **YAML-based CI/CD pipelines** in Azure DevOps covering build, test, and release stages; reduced manual deployment effort by **~90%** .
- Worked on automation testing using **Java and Selenium**, contributing to regression and smoke test execution .
- Designed **cloud hosting** for the internal platform, including infrastructure planning and Azure deployment strategy .

Contact : Subhajit Roy

AI Imaging Intern L&T Technology Services

07/2022 - 11/2022

Coimbatore

Achievements/Tasks

- Contributed to an AI-based liver segmentation and tumor detection solution using **Machine Learning** with **1000+** medical imaging DICOM datasets .
- Received formal appreciation from the **Imaging COE Specialist team** for technical contributions to the project .
- Worked with **AI/ML** technologies, **medical imaging** systems, and **DICOM** image processing .

PERSONAL PROJECTS

DevOps CI/CD Pipeline Architecture (03/2026 - Present)

- Designed end-to-end CI/CD pipeline and cloud deployment architecture using Docker and Azure, covering build automation, environment management, and release workflows.

Pipeline Management Platform (07/2025 - Present)

- Centralized app managing 30+ pipelines across teams with execution, scheduling, monitoring, analytics, and PDF reporting — preventing accidental modifications and improving governance.

Drag-and-Drop Website Builder (02/2024 - 05/2024)

- Dynamic page builder with real-time layout editing and reusable component architecture.
